## Annex B

## Environmental Mitigation Implementation Schedule

## Annex B Environmental Mitigation Implementation Schedule

EIA Ref.	EM&A Ref	Environmental Protection Measures/ Mitigation Measures	Objectives of the Recommended Measure & Main Concerns to address	Location of the Measures	Who to implement the measure?	When to implement the measure? (1) D C O/R A	What requirements or standards for the measure to achieve?	Implementation Status and Remarks
Air Quali	ity - Cons	struction Phase						
4.8.1	AQ1	Blasting	To minimise	Blasting area	SENTX	✓	Air Pollution Control	Not applicable.
		• The area within 30m of the blasting area will be wetted prior to blasting.	potential dust nuisance	and 30m of blasting area	Contractor		(Construction Dust) Regulations	Blasting is not required in the latest landfill design
		<ul> <li>Blasting will not be carried out when the strong wind signal or tropical cyclone warning signal No. 3 or higher is hoisted, unless this is with the express prior permission of the Commissioner of Mines.</li> </ul>						O .
		• loose material and stones in the Site will be removed prior to the blast operation						
		<ul> <li>During blasting, blast nets, screens and other protective covers will be used to prevent the projection of flying fragments and material resulting from blasting</li> </ul>						
4.8.1	AQ2	Rock Drilling	To minimise	Rock drilling	SENTX	✓	Air Pollution Control	Not applicable.
		<ul> <li>Watering will be carried out at the rock drilling activities to avoid fugitive dust emissions.</li> </ul>	potential dust nuisance	area	Contractor		(Construction Dust) Regulations	Rock drilling is not required in the latest landfill design
4.8.1	AQ3	Site Access Road	To minimise	Main haul	SENTX	✓	Air Pollution Control	Deficiency of

EIA Ref.	EM&A Ref	Environmental Protection Measures/ Mitigation Measures	Objectives of the Recommended Measure & Main Concerns to address	Location of the Measures	Who to implement the measure?	When to implement the measure? (1) D C O/R A	What requirements or standards for the measure to achieve?	Implementation Status and Remarks
		The main haul road will be kept clear of dusty materials or sprayed with water.	potential dust nuisance	road	Contractor		(Construction Dust) Regulations	mitigation measures but rectified by the Contractor
		• The main haul road will be paved with aggregate or gravel.					HKAQO and EIAO-TM Annex 4	
		• Vehicle speed will be limited to 10kph.						
4.8.1	AQ4	Stockpiling of Dusty Materials	To minimise	All	SENTX	✓	Air Pollution Control	Implemented
		<ul> <li>Any stockpile of dusty materials will be covered entirely by impervious sheeting</li> </ul>	potential dust nuisance	construction works area	Contractor		(Construction Dust) Regulations	
		or placed in an area sheltered on the top and three sides or sprayed with water so as to ensure that the entire surface is wet.					HKAQO and EIAO-TM Annex 4	
4.8.1	AQ5	<u>Loading, unloading or transfer of dusty</u> <u>materials</u>	To minimise potential dust	All construction	SENTX Contractor	✓	Air Pollution Control (Construction Dust) Regulations	Implemented
		<ul> <li>All dusty materials will be sprayed with water immediately prior to any loading, unloading or transfer operation so as to maintain the dusty material wet.</li> </ul>	nuisance	works area			HKAQO and EIAO-TM Annex 4	
4.8.1	AQ6	Site Boundary and Entrance	To minimise	Site boundary	SENTX	✓	Air Pollution Control	Not applicable
		Where a site boundary adjoins a road, street, service lane or other area accessible	potential dust nuisance	and entrance	Contractor		(Construction Dust) Regulations	
		to the public, hoarding of height not less than 2.4m from ground level will be provided along the entire length of that portion of the site boundary except for the site entrance or exit.					HKAQO and EIAO-TM Annex 4	
4.8.1	AQ7	Excavation Works	To minimise	All	SENTX	✓	Air Pollution Control	Implemented

EIA Ref.	EM&A Ref	Environmental Protection Measures/ Mitigation Measures	Objectives of the Recommended Measure & Main Concerns to address	Location of the Measures	Who to implement the measure?	When to implement the measure? (1) D C O/R A	What requirements or standards for the measure to achieve?	Implementation Status and Remarks
		Working area of any excavation or earth moving operation will be sprayed with water immediately before, during and immediately after the operation so as to ensure that the entire surface is wet.	potential dust nuisance	construction works area	Contractor		(Construction Dust) Regulations HKAQO and EIAO-TM Annex 4	
4.8.1	AQ8	<ul> <li>Building Demolition</li> <li>The area where the demolition works are planned to take place will be sprayed with water immediately prior to, during and immediately after the demolition activities.</li> <li>Any dusty materials remaining after a stockpile is removed will be wetted with water and cleared from the surface of roads or street.</li> </ul>	To minimise potential dust nuisance	All construction works area	SENTX Contractor	<b>✓</b>	Air Pollution Control (Construction Dust) Regulations HKAQO and EIAO-TM Annex 4	Implemented
4.8.1	AQ9	<ul> <li>Construction of the Superstructure of Building <ul> <li>Effective dust screens, sheeting or netting will be provided to enclose the scaffolding from the ground level up to the highest level of the scaffolding.</li> </ul> </li></ul>	To minimise potential dust nuisance	All construction works area	SENTX Contractor	✓	Air Pollution Control (Construction Dust) Regulations HKAQO and EIAO-TM Annex 4	Implemented
4.8.1	AQ10	Should a stone crushing plant be needed on site, the control measures recommended in the Best Practicable Means Requirement for Mineral Works (Stone Crushing Plants) BPM 11/1 should be implemented.	To minimise potential dust nuisance	Stone crushing plant/construction phase	SENTX Contractor	<b>√</b>	Best Practicable Means Requirement for Mineral Works (Stone Crushing Plants) BPM 11/1	Not applicable. Stone crushing plant is not required in the latest landfill design

EIA Ref.	EM&A Ref	Environmental Protection Measures/ Mitigation Measures	Objectives of the Recommended Measure & Main Concerns to address	Location of the Measures	Who to implement the measure?	im me	asur	ent the	What requirements or standards for the measure to achieve?	Implementation Status and Remarks
4.8.1	AQ11	Good site practices such as regular maintenance and checking of the diesel powered mechanical equipment will be adopted to avoid any black smoke emissions and to minimize gaseous emissions.	To minimise potential dust nuisance	All construction works area	SENTX Contractor		<b>✓</b>		HKAQO and EIAO-TM Annex 4	Implemented
4.10.1	AQ12	Dust monitoring once every 6 days	Ensure the dust generated from the project meets the air quality requirement	At monitoring locations shown in <i>Figure 3.2a</i>	SENTX Contractor		<b>✓</b>		HKAQO and EIAO-TM Annex 4	Implemented
Air Quali	ty - Oper	ation, Restoration and Aftercare Phases								
4.8.2	AQ13	Odour  • Enclosing the weighbridge area	To minimise odour nuisance	Weighbridge area	SENTX Contractor	✓		<b>✓</b>	EIAO-TM Annex 4	Not Applicable. As SENTX will receive construction waste only which is significantly less odorous, enclosing the weighbridge area is not necessary
4.8.2	AQ14	Providing a vehicle washing facility before the exit of SENTX and providing sufficient signage to remind RCV drivers to pass through the facility before leaving SENTX		Vehicle washing facility	SENTX Contractor	✓		✓	EIAO-TM Annex 4	Implemented
4.8.2	AQ15	Reminding the RCV drivers to empty the liquor collection sump and close the valve	To minimise odour nuisance	Tipping face	SENTX Contractor			✓	EIAO-TM Annex 4	Not Applicable. As SENTX will receive construction waste

EIA Ref.	EM&A Ref	Mitigation Measures	Objectives of the Recommended Measure & Main Concerns to address	Location of the Measures	Who to implement the measure?	When to implement the measure? (1) D C O/R A	What requirements or standards for the measure to achieve?	Implementation Status and Remarks
		before leaving the tipping face						only, which is relatively dry, the amount of liquor generated is expected to minimal
4.8.2	AQ16	8	To minimise odour nuisance	SENTX Site	SENTX Contractor	✓	EIAO-TM Annex 4	Not Applicable. As SENTX will receive construction waste only, which is relatively dry, the amount of liquor generated is expected to minimal.
4.8.2	AQ17	Reminding operators to properly maintain their RCVs and ensure that liquor does not leak from the vehicles		SENTX Site	SENTX Contractor	<b>√</b>	EIAO-TM Annex 4	Not Applicable. As SENTX will receive construction waste only, which is relatively dry, the amount of liquor generated is expected to minimal.
4.8.2	AQ18	0	To minimise odour nuisance	SENTX Site	SENTX Contractor	<b>√</b> ✓ ✓	EIAO-TM Annex 4	Implemented

EIA Ref.	EM&A Ref		nvironmental Protection Measures/ Iitigation Measures	Objectives of the Recommended Measure & Main Concerns to address	Location of the Measures	Who to implement the measure?	im	hen t plen easur C	nent e? <sup>(1)</sup>		What requirements or standards for the measure to achieve?	Implementation Status and Remarks
4.8.2	AQ19	•	Progressive restoration of the areas which reach the finished profile (a final capping system including an impermeable liner will be put in place) and installation of a permanent landfill gas extraction system	To minimise odour nuisance	SENTX Site	SENTX Contractor	<b>✓</b>		✓	<b>√</b>	EIAO-TM Annex 4	Implemented
4.8.2	AQ20	•	Installing deodorizers along the site boundary adjacent to the ASRs	To minimise odour nuisance	SENTX Site boundary	SENTX Contractor			<b>√</b>	✓	EIAO-TM Annex 4	Not Applicable. As SENTX will receive construction waste only which is significantly less odorous, installation of deodorizers is not necessary.
4.8.2	AQ21	•	Erecting a vertical barrier, wall or structure softened by planting rows of trees/shrubs or landscape feature along the site boundary, particularly in the areas near the ASRs	To minimise odour nuisance	SENTX Site boundary	SENTX Contractor	✓		✓	<b>✓</b>	EIAO-TM Annex 4	Implemented
4.8.2 and SENTX latest design	AQ22	•	Maintaining the size of the active tipping face not greater than 1,200 m <sup>2</sup>	To minimise odour nuisance	Active tipping face	SENTX Contractor			<b>✓</b>		EIAO-TM Annex 4	Implemented
4.8.2	AQ23	•	Promptly covering the MSW with soil or selected inert materials to control odour emissions	To minimise odour nuisance	Active tipping face	SENTX Contractor			✓		EIAO-TM Annex 4	Not Applicable. SENTX will not receive MSW.

EIA Ref.	EM&A Ref		Invironmental Protection Measures/ Aitigation Measures	Objectives of the Recommended Measure & Main Concerns to address	Location of the Measures	Who to implement the measure?	When to implement the measure? (1) D C O/R A	What requirements or standards for the measure to achieve?	Implementation Status and Remarks
4.8.2	AQ24	•	Maintaining the size of the special waste trench not greater than $6m$ (l) $\times$ 2.5m (w)	To minimise odour nuisance	Special waste trench	SENTX Contractor	✓	EIAO-TM Annex 4	Not Applicable. SENTX will not have any special waste trench.
4.8.2 and SENTX latest design	AQ25	•	Covering daily covered area with a tarpaulin sheet or 300mm of soil after the landfill operating hours	To minimise odour nuisance	Daily covered area	SENTX Contractor	✓	EIAO-TM Annex 4	Implemented
4.8.2	AQ26	•	Covering special waste trench with 600 mm of soil and an impervious liner after 5 pm	To minimise odour nuisance	Special waste trench	SENTX Contractor	✓	EIAO-TM Annex 4	Not Applicable. SENTX will not have any special waste trench.
4.8.2	AQ27	•	Covering the non-active tipping face with 600mm of soil and an impermeable liner (on top of the intermediate cover), which will not only control odour emissions from landfilled waste but also enhance landfill gas extraction by the landfill gas extraction system	To minimise odour nuisance	Intermediate cover	SENTX Contractor	<b>√</b>	EIAO-TM Annex 4	Implemented
4.8.2	AQ28	•	Applying deodorizers or odour suppression agents to control odour emissions from the active tipping face and special waste trench, if any, through spraying or fogging equipment	To minimise odour nuisance	Active tipping face and special waste trench	SENTX Contractor	<b>✓</b>	EIAO-TM Annex 4	Not Applicable. As SENTX will receive construction waste only which is significantly less odorous, installation of deodorizers is not necessary.

EIA Ref.	EM&A Ref	Environmental Protection Measures/ Mitigation Measures	Objectives of the Recommended Measure & Main Concerns to address	Location of the Measures	Who to implement the measure?	When t implem measur D C	ent th		What requirements or standards for the measure to achieve?	Implementation Status and Remarks
										Moreover, SENTX will not have any special waste trench.
4.8.2	AQ29	<ul> <li>Providing a mobile cover with retractable or suitable opening to cover up the opening of the special waste trench except during waste deposition and a suitable odour removal unit. The mobile cover should be equipped with powered extraction and suitable odour removal unit for purifying the trapped gas inside the trench before release into the atmosphere</li> </ul>	To minimise odour nuisance	Special waste trench	SENTX Contractor		<b>√</b>		EIAO-TM Annex 4	Not Applicable. SENTX will not have any special waste trench.
4.8.2 and SENTX latest design	AQ30	Providing a thermal oxidizer for the leachate treatment plant	To minimise odour nuisance as a result of breakdown of thermal oxidizer	Leachate treatment plant	SENTX Contractor	✓	✓	✓	EIAO-TM Annex 4	Implemented
4.8.2 and SENTX latest design	AQ31	• Enclosing all the leachate storage and treatment tanks (except for the Sequential Batch Reactor (SBR) or Membrane Bioreactor (MBR) tanks) and diverting the exhaust air from these tanks to a thermal oxidizer or flare to avoid potential odour emissions from the LTP	To minimise odour nuisance	Leachate treatment plant	SENTX Contractor	<b>√</b>	<b>✓</b>	✓	EIAO-TM Annex 4	Implemented
4.8.2	AQ32	Rescheduling of waste filling activities on- site by avoiding waste filling activities	To minimise odour nuisance	SENTX Site	SENTX Contractor		✓		EIAO-TM Annex 4	Not Applicable. As SENTX will receive

EIA Ref.	EM&A Ref	Environmental Protection Measures/ Mitigation Measures	Objectives of the Recommended Measure & Main Concerns to address	Location of the Measures	Who to implement the measure?	When to implement the measure? (1) D C O/R A	What requirements or standards for the measure to achieve?	Implementation Status and Remarks
		carrying out at the northern area of the site in the summer months between July to November						construction waste only which is significantly less odorous, rescheduling of waste filling activities is not necessary.
4.8.2 and SENTX	AQ33	Dust, Gaseous Emission and LFG including Volatile Organic Compounds (VOCs)	To minimise dust nuisance	SENTX Site	SENTX Contractor	✓	HKAQO and EIAO-TM Annex 4	Implemented
latest design		Keeping the main haul road to the waste filling area wet by regular watering;						
4.8.2	AQ34	<ul> <li>Compacting the exposed daily and intermediate covered areas well to avoid fugitive dust emission;</li> </ul>	To minimise dust nuisance	SENTX Site	SENTX Contractor	✓	HKAQO and EIAO-TM Annex 4	Implemented
4.8.2	AQ35	• Limiting the vehicle speed within SENTX site boundary;	To minimise dust nuisance	SENTX Site	SENTX Contractor	✓	HKAQO and EIAO-TM Annex 4	Implemented
4.8.2	AQ36	<ul> <li>Providing vehicle washing bay to avoid vehicles carrying dust to public roads;</li> </ul>	To minimise dust nuisance	SENTX Site	SENTX Contractor	✓	HKAQO and EIAO-TM Annex 4	Implemented
4.8.2	AQ37	Switching off the engine when the diesel- driven equipment is idling;	To minimise gaseous emissions	SENTX Site	SENTX Contractor	✓ ✓	-	Implemented
4.8.2	AQ38	Maintaining the construction equipment properly to avoid any black smoke	To minimise gaseous	SENTX Site	SENTX Contractor	✓ ✓	-	Implemented

EIA Ref.	EM&A Ref	Environmental Protection Measures/ Mitigation Measures	Objectives of the Recommended Measure & Main Concerns to address	Location of the Measures	Who to implement the measure?	imp mea	en to pleme sure?	(1)		What requirements or standards for the measure to achieve?	Implementation Status and Remarks
		emissions;	emissions								
4.8.2	AQ39	Providing sufficient underground landfill gas collection system to capture the landfill gas generated as much as possible; and	To minimise gaseous emissions, including LFG and VOCs	SENTX Site	SENTX Contractor			✓	✓	EIAO-TM Annex 4	Implemented
4.8.2	AQ40	Periodic inspections of the final cover should be undertaken to ensure that the capping layer is in good conditions at all times.	To minimise gaseous emissions, including LFG and VOCs	SENTX Site	SENTX Contractor			✓	✓	EIAO-TM Annex 4	Implemented
4.10.2	AQ41	Monitoring of ambient TSP once every 6 days	Ensure the dust emission from the project meets the dust requirement	shown in	SENTX Contractor		✓	✓		HKAQO and EIAO-TM Annex 4	Implemented
4.10.2	AQ42	Monitoring of ambient VOCs, ammonia and $\mathrm{H}_2\mathrm{S}$ , quarterly	Ensure the gaseous emission from the project meets the air quality requirement	At monitoring locations shown in <i>Figure 11.3a</i>	SENTX Contractor			✓	<b>√</b>	Odour thresholds or 1% of Occupational Exposure Limit (OEL) as stipulated in the "UK Health and Safety Executive (HSE) EH 40/05 Occupational Exposure Limits", whichever is lower.	Implemented

EIA Ref.	EM&A Ref	Environmental Protection Measures/ Mitigation Measures	Objectives of the Recommended Measure & Main Concerns to address	Location of the Measures	Who to implement the measure?	When to implement the measure? (1) D C O/R		What requirements or standards for the measure to achieve?	Implementation Status and Remarks
4.10.2 and SENTX latest design	AQ43	Monitoring of parameters for thermal oxidizer, flares and generator in accordance with requirements stated in Tables 3.4a, 3.5a and 3.6a of the EM&A Manual respectively.	Ensure the gaseous emission from the project meets the air quality requirement	At the flares and thermal oxidizer stacks when they are in operation	SENTX Contractor	✓	<b>√</b> (1)	Emission Limits specified in Contract	Implemented
4.10.2	AQ44	To confirm design assumption of ammonia, it is recommended that the ammonia concentration in the flue gas of the thermal oxidiser be monitored during the commissioning stage of the thermal oxidiser. If required, an emission standard will be set for ammonia for the thermal oxidiser based on the monitoring results. If no ammonia is detected in the flue gas during the decommissioning stage, the monitoring of ammonia in the flue gas of the thermal oxidiser could be discontinued.	Ensure the gaseous emission from the project meets the air quality requirement	At the thermal oxidizer stack during commissioning . If ammonia is detected during commissioning stage, the monitoring will continue.	Contractor	✓		Emission Limits determined during commissioning stage	Implemented
4.10.2 and SENTX latest design	AQ45	Odour patrol in accordance with requirements stated in Table 3.7a of the EM&A Manual.	Ensure the odour emission from the project meets the odour requirement	_	SENTX Contractor	✓		EIAO-TM Annex 4	Implemented
4.10.2	AQ46	Monitoring of meteorological station, continuously	Collect site specific	At meteorological	SENTX Contractor	✓ ✓	✓	-	Implemented

<sup>(1)</sup> For LFG flare and LFG generator only.

EIA Ref.	EM&A Ref	Environmental Protection Measures/ Mitigation Measures	Objectives of the Recommended Measure & Main Concerns to address	Location of the Measures	Who to implement the measure?	When to implement the measure? (1) D C O/R A	What requirements or standards for the measure to achieve?	Implementation Status and Remarks
			meteorological data	station shown in <i>Figure 11.3a</i>				
Noise - C	onstructi	on Phase						
5.7.1	N1	Adopt good site practice listed below:     Only well-maintained plant will be operated on-site and plant should be serviced regularly during the construction program;	To minimise potential construction noise nuisance.	All construction works area	SENTX Contractor	✓	Noise Control Ordinance (NCO) and EIAO-TM Annex 5	Implemented
		• Silencers or mufflers on construction equipment should be utilized and will be properly maintained during the construction program;						
		• Mobile plant, if any, will be sited as far from NSRs as possible;						
		Machines and plant (such as trucks) that may be in intermittent use will be shut down between work periods or should be throttled down to a minimum;						
		Plant known to emit noise strongly in one direction will, wherever possible, be orientated so that the noise is directed away from the nearby NSRs; and						
		Material stockpiles and other structures will be effectively utilised, wherever practicable, in screening noise from on-site						

EIA Ref.	EM&A Ref	Environmental Protection Measures/ Mitigation Measures	Objectives of the Recommended Measure & Main Concerns to address	Location of the Measures	Who to implement the measure?	When to implement the measure? (1) D C O/R A	What requirements or standards for the measure to achieve?	Implementation Status and Remarks
5.8	N2	construction activities.  Weekly noise monitoring	Ensure noise generated from the project meets the criteria	At monitoring locations shown in Figure 6.4a	SENTX Contractor	✓	Noise Control Ordinance (NCO) and EIAO-TM Annex 5	Implemented
Noise - O	peration)	Restoration Phase						
5.7.2	N3	Adopt good site practice listed below:  • Choose quieter PME;	To minimise potential operational noise nuisance.	Within the SENTX Site	SENTX Contractor	✓	Noise Control Ordinance (NCO) and EIAO-TM Annex 5	Implemented
		• Include noise levels specification when ordering new plant items;					-	Implemented
		• Locate fixed plant items or noise emission points away from the NSRs as far as practicable;					-	Implemented
		Locate noisy machines in completely enclosed plant rooms or buildings; and					-	Implemented
		Develop and implement a regularly scheduled plant maintenance programme so that plant items are properly operated and serviced. The programme should be implemented by properly trained personnel.					-	Implemented
5.8	N4	Weekly noise monitoring	Ensure noise generated from	At monitoring locations	SENTX Contractor	✓	Noise Control Ordinance (NCO) and EIAO-TM	Implemented

EIA Ref.	EM&A Ref	Environmental Protection Measures/ Mitigation Measures	Objectives of the Recommended Measure & Main Concerns to address	Location of the Measures	Who to implement the measure?	When to implement the measure? (1) D C O/R A	What requirements or standards for the measure to achieve?	Implementation Status and Remarks
			the project meets the criteria	shown in Figure 6.4a			Annex 5	
Water Qu	ality – Co	onstruction Phase						
6.8.1	WQ1	Construction Runoff						
		• Exposed soil areas will be minimised to	To minimise	All	SENTX	✓	ProPECC PN 1/94	Implemented
		reduce the contamination of runoff and erosion.	potential water quality impacts arising from the construction works	construction works area	Contractor		EIAO-TM Annex 6	
6.8.1	WQ2	• Perimeter channels will be constructed in advance of site formation works and earthworks and intercepting channels will be provided for example along the edge of	To minimise	All	SENTX	✓ ✓	ProPECC PN 1/94	Implemented
			potential water quality impacts arising from the	construction works area	Contractor		Water Pollution Control Ordinance (WPCO)	
		excavation.	construction works				EIAO-TM Annex 6	
6.8.1	WQ3	Silt removal facilities, channels and	To minimise	All	SENTX	✓	ProPECC PN 1/94	Deficiency of
		manholes will be maintained and the	potential water quality impacts	construction works area	Contractor		WPCO	mitigation measures but rectified by the
		deposited silt and grit should be removed regularly to ensure they are functioning properly at all times.	arising from the construction works	works area			EIAO-TM Annex 6	Contractor
6.8.1	WQ4	Temporary covers such as tarpaulin will	To minimise	All	SENTX	✓	ProPECC PN 1/94	Implemented
		also be provided to minimise the generation of high SS runoff.	potential water quality impacts arising from the construction works	construction Cont works area	Contractor		WPCO	

EIA Ref.	EM&A Ref	Environmental Protection Measures/ Mitigation Measures	Objectives of the Recommended Measure & Main Concerns to address	Location of the Measures	Who to implement the measure?	When to implement the measure? (1) D C O/R A	What requirements or standards for the measure to achieve?	Implementation Status and Remarks
6.8.1	WQ5	The surface runoff contained any oil and grease will pass through the oil interceptors.	To minimise potential water quality impacts arising from the construction works	All construction works area	SENTX Contractor	<b>√</b>	ProPECC PN 1/94 WPCO EIAO-TM Annex 6	Implemented
6.8.1	WQ6	All sewer and drains will be sealed to prevent building debris, soil etc from entering public sewers/drains before commencing any demolition works	To minimise potential water quality impacts arising from the demolition works	Infrastructure area at existing SENT Landfill	SENTX Contractor	✓	ProPECC PN 1/94 WPCO EIAO-TM Annex 6	Not applicable
6.8.1	WQ7	During the excavation works for the twin drainage tunnels, the recycle water for cooling the cutter head of the TBM will be conveyed to the sedimentation tanks for treatment and most of the treated water will be reused, where applicable and as much as possible, in the boring operations.	To minimise potential water quality impacts arising from the tunnel works	Tunnel boring sites	SENTX Contractor	<b>✓</b>	ProPECC PN 1/94 WPCO EIAO-TM Annex 6	Not applicable. Excavation of drainage tunnels is not required in the latest landfill design.
6.8.1	WQ8	The fuel and waste lubricant oil from the on-site maintenance of machinery and equipment will be collected by a licensed chemical waste collector.	To minimise potential water quality impacts arising from improper handling of fuel and oil	SENTX Site	SENTX Contractor	✓	ProPECC PN 1/94 WPCO Waste Disposal Ordinance (WDO)	Implemented
6.8.1	WQ9	Implementation of excavation schedules, lining and covering of excavated stockpiles	To minimise contaminated stormwater runoff from the	All construction works	SENTX Contractor	<b>✓</b>	ProPECC PN 1/94 WPCO EIAO-TM Annex 6	Implemented
